HEALTH AI

The Global Agency for Responsible AI in Health

**Why We Should Embrace
AI Rather Than Fear It?**

AI across the Health Value Chain

Research & Development

Drug Discovery:
Accelerates candidate identification

Clinical Trials:
Optimizes trial design

Genomic Sequencing:
Speeds analysis of genetic data

Virtual Patient Simulations: Reduces need for early-stage human trials

Systems Medicine:
Designs complex therapies

Manufacturing & Distribution

Supply Chain Optimization: Reduces waste, improves delivery

Quality Control:
Ensures product safety at scale

Inventory Management:
Optimizes stock levels

Autonomous Manufacturing:
Enhances efficiency, reduces error

Predictive Maintenance for Equipment: Minimizes downtime

Population Health & Delivery of Care

Diagnostic Assistance:
Improves accuracy of diagnostics

Treatment Personalization: Tailors treatment plans

Robotic Surgery: Aids in precise surgeries

Remote Surgery:
Expands access to expert surgical care

Real-Time Population & Patient Monitoring:
Identifies, anticipates and prevents threats, diseases and complications

Post-Care & Monitoring

Remote Monitoring:
Monitors patient health remotely

Rehabilitative AI Tools:
Provides feedback during rehabilitation

Predictive Risk Modeling: Aids preventative care efforts

Personal Health Assistants: Offers personalized health management

Mental Health Interventions: Provides real-time therapy support

Admin & Info Management

Billing & Claims Processing: Automates administrative tasks

Patient Data Management:
Improves data security and compliance

Resource Allocation:
Optimizes use of healthcare resources

AI-driven Policy & Compliance: Suggests efficiency-improving policies and semi-automates compliance

Fraud Detection:
Detects and prevents fraudulent activities

Distribution of AI in Healthcare startups

Moving Towards a Fragmented Regulatory Landscape?

THE WHITE HOUSE

Administration | Priorities | The Record | Brief

OCTOBER 30, 2023

FACT SHEET: President Biden Issues Executive Order on Safe, Secure, and Trustworthy Artificial Intelligence

[BRIEFING ROOM](#) | [STATEMENTS AND RELEASES](#)

Today, President Biden is issuing a landmark Executive Order to ensure that America leads the way in seizing the promise and managing the risks of artificial intelligence (AI). The Executive Order establishes new standards for AI safety and security, protects Americans' privacy, advances equity and civil rights, stands up for consumers and workers, promotes innovation and competition, advances American leadership around the world, and more.

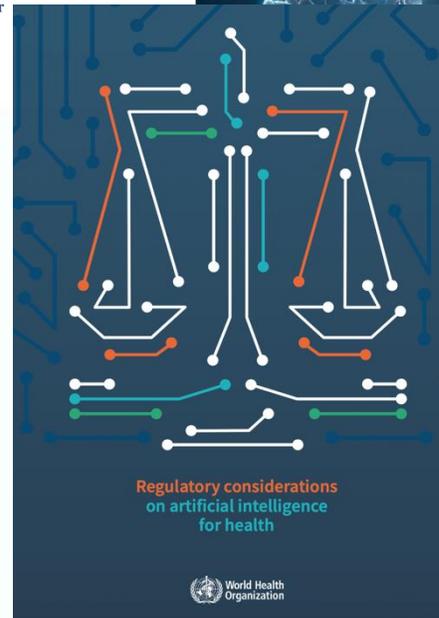

European Parliament

EU AI Act: first regulation on artificial intelligence

Society Updated: 14-06-2023 - 14:06
Created: 08-06-2023 - 11:40

The use of artificial intelligence in the EU will be regulated by the AI Act, the world's first comprehensive AI law. Find out how it will protect you.

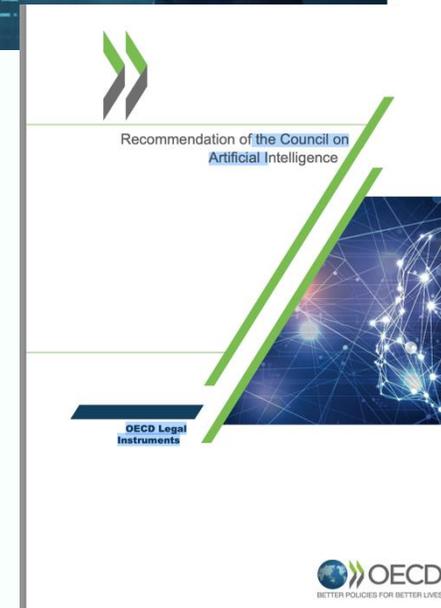

GOV.UK

Home > [AI Safety Summit 2023](#)

About the AI Safety Summit 2023

The UK Prime Minister will host the AI Safety Summit 2023 on the 1 and 2 November at Bletchley Park, Buckinghamshire.

The summit will bring together international governments, leading AI companies, civil society groups and experts in research to consider the risks of AI, especially at the frontier of development, and discuss how they can be mitigated through internationally coordinated action.

Regulatory Challenges for AI in Healthcare

Global fragmentation

- Navigate **differential requirements** in different countries/regions
- Varying approval processes and timelines

Fast evolving AI

- **Fast evolving** AI developments
- New regulations and standards in **response to emerging tech**

Data concerns

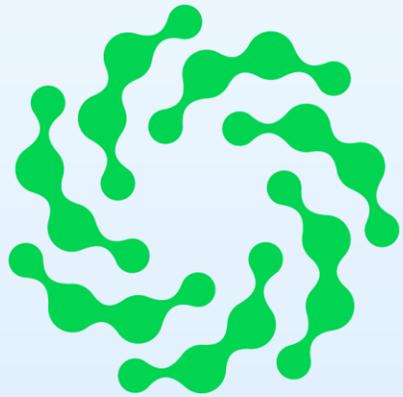

- **Data security and privacy**
- **AI methods have *opaque* inner workings**

Post-market surveillance

- **Monitor safety and effectiveness** of devices
- Adaptive learning with more data (need for periodic monitoring)

The Challenge

Lack of effective governance of AI in 'health' increases risks for citizens and systems which stimulates distrust and slow adoption of responsible AI solutions that can lead to better health outcomes for all

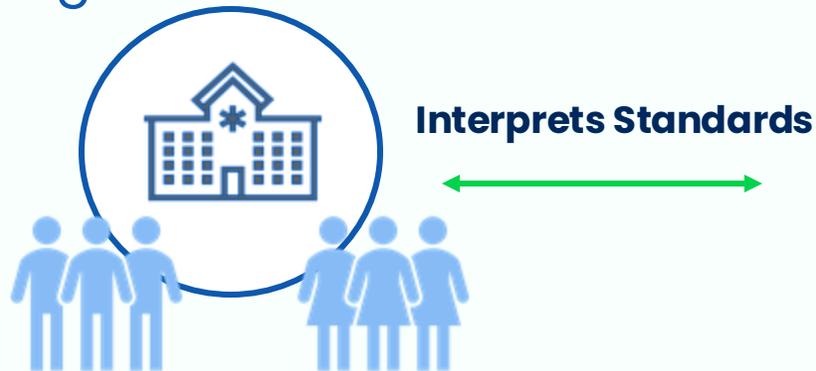

HEALTH AI

The Global Agency for Responsible AI in Health

HealthAI Governance Role

HealthAI serves as a bridge between normative bodies and national and regional regulatory bodies to strengthen capacity and certify their regulatory mechanisms.

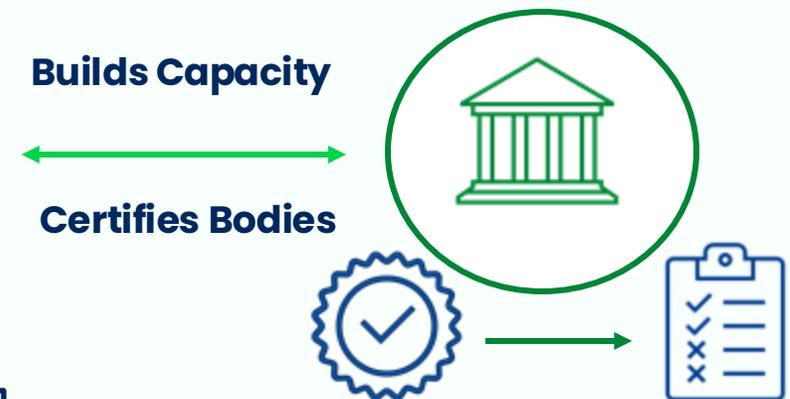

Normative Bodies
Set global standards

HealthAI will not define standards. This falls under the responsibility of international and/or national normative and standard setting organizations.

Regulatory Bodies
Validate AI solutions

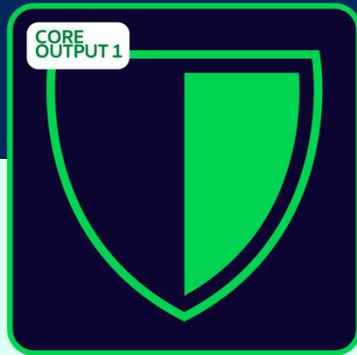

HealthAI will not validate AI tools for health systems. This falls under the responsibility of national and/or regional regulatory bodies.

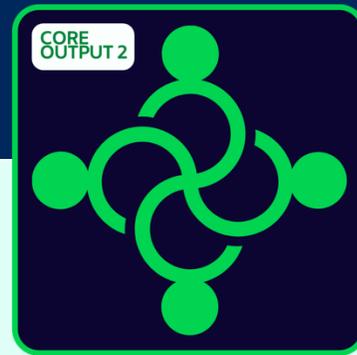

- Facilitates and Stewards**
- Community of Practice
- Global Regulatory Network
- Global Public Repository of validated AI solutions for health

HealthAI Strategy 2024–2026

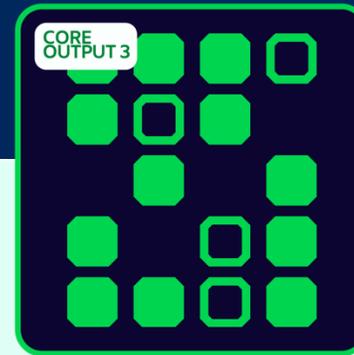

Responsible AI Solutions for Health

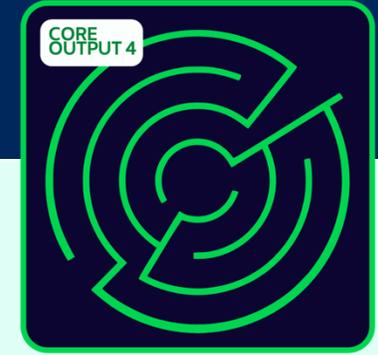

Co-create and certify **National & Regional validation mechanisms** on Responsible AI for Health

Establish a **Global Regulatory Network** for knowledge sharing and adverse events - '**Global Early Warning System**'

Create a **Global Public Repository** of validated AI solutions for Health

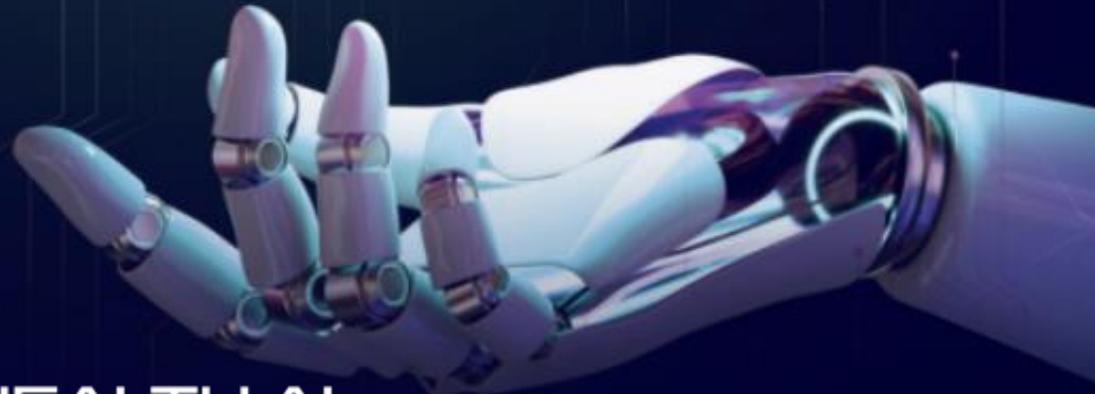

Deliver **advisory support** on Policies and Regulations

HealthAI Community of Practice
